

DELIVERY OPTIONS

Looking for more than just a staffing company? What if you had a resource on call who understands your business, challenges, frustrations and consequences? By partnering with BenchmarkQA you'll have access to strategic consulting professionals whose expertise and dedication will help solve your quality assurance and testing challenges. You'll benefit from our flexible and innovative models for delivering our services, designed to maximize the combination of both your resources and ours to ensure your project's success.

STAFFING & CONSULTING MODEL

The most talented professionals in the quality assurance industry are at your service. These experts are employed with BenchmarkQA because we understand, respect, nurture and leverage their unique capabilities. You will interview only the best candidates — those who meet your specific resource requirements.

Flexible staffing options:

- **Contract:** Your consultant works on a specific project with a stated start and end date. Hiring the consultant for permanent employment is typically not an option.
- **Contract-to-Hire:** Your consultant completes a specific contract and you may consider the consultant for full-time employment.
- **Flex Team:** You benefit from a flexible and cost-effective solution for a large engagement with predictable peaks and valleys in which the continuity of resources is critical to the project's success.
- **Direct Placement:** You hire a candidate provided by BenchmarkQA for a specific full-time position.

PROJECT MODEL

Leave it to the experts — without giving up control. Using the Project Model option for delivery of our services, you empower BenchmarkQA to establish the scope, timeline, budget and deliverables of the project on your behalf, and manage the execution of every project detail to ensure your success. You leverage our consulting expertise to accomplish a specific project, being only as involved as you wish to be.

OUTSOURCING MODEL

Leverage our expertise through the total outsourcing of your quality assurance and testing, right here in the Twin Cities. You'll reap the benefits of a team and a dedicated test facility developed to your specifications without the hassle and expense of hosting it in-house.
