

STRUCTURED SOFTWARE TEST PLANNING

Customized Private Training

Our Private SSTP course is a complete package of services designed to ensure that the great concepts, methods, and processes we teach turn in to great results for your organization. We start by meeting with you to understand the current processes and standards within your organization, and then determine what customization might be needed (modify training topics, incorporate your terminology, templates, or processes, develop group exercises relevant to your industry, etc.). During delivery, we use a highly-interactive learning method to share the best practices we have learned over more than 20 years in QA consulting. We cover more than concepts – we provide coaching in how to effectively apply the concepts within the dynamics of *your* specific environment and industry.

Each participant receives a manual of over 170 pages (not a just a Powerpoint presentation) that serves as a valuable future reference. The Participant Manual includes a glossary of terms, an index and table of contents, as well as a participant workbook with actual hands-on exercises used in class to practice the concepts and techniques covered. We even give you a flash drive of our time-tested, proprietary templates! Hands-on, on-site mentoring and follow-up is included to support your participants in applying the course information to your unique environment.

The Private Delivery of SSTP includes:

- Two days of instruction from a dynamic and proven leader in QA and testing
- Up to 8 hours of course customization
- Electronic copies of and rights to use BQA proprietary and proven templates
- On-site follow-up and mentoring of up to 4 hours

Private courses can be held at the client site or at BenchmarkQA's facility in Minneapolis, MN. Up to twenty (20) participants can attend the private course – greatly reducing the average cost per attendee.

Once customized, the same course may be delivered again at a later date within your organization for a reduced rate. Within one year of delivery of the customized training, employees can attend a public offering of SSTP at a reduced rate. This is a valuable benefit when your team grows by only a few people.
